

# HURRICANE™ TURBINE VENTILATORS

the proven answer for over fifteen years

## COMMERCIAL PROJECT PROFILE

Job No.: 31523

**LOCATION:** Bunnerong Gymnasium  
Matraville Road, Bunnerong.

**BUSINESS:** A gymnasium.

**TASK:** Substantially improve air quality in the gym. The six *IVR* 760mm vents were allegedly having little impact on ventilation. Two were inoperative.

**SOLUTION:** **Edmonds** proposed the replacement of the 6 steel *IVR* vents with 7 aluminium **H700 HURRICANE™ TURBINE VENTILATORS**. The **HURRICANES™** exhaust considerably more air than the same sized heavier steel units and use a TANDACO 100mm spindle bearing specially produced for **Edmonds**.

**RESULT:** Customer found that air in the gymnasium was considerably fresher due to the more efficient performance of the **Hurricane™**. This result is consistent with independent tests carried out by the University of Technology that showed a **HURRICANE™ H400 outperformed** an *IVR* 400mm vent by **206%**.
