

HURRICANE™ TURBINE VENTILATORS

the proven answer for over fifteen years

COMMERCIAL PROJECT PROFILE

Job No.: 28460

LOCATION: Child Care Centre
Sydney University, NSW Australia.

BUSINESS: A child care facility for university staff, students and local parents.

TASK: To provide natural ventilation in change rooms, lay down rooms and the administration area. Making the environment more comfortable for children.

SOLUTION: Edmonds recommended the installation of 12 x H400 HURRICANE™ TURBINE VENTILATORS powder coated white complete with dampers and EC grilles, which allows warm, stale air to be drawn directly from the rooms.

RESULT: The HURRICANES™ provided a fresher day to day environment and considerably reduced summer temperatures. The end result has made the environment of the child care centre substantially more comfortable for children to spend long periods of time.
